EDUCATION

10-2020 to 07-2024

MANIPAL UNIVERSITY JAIPUR

- BTech in Computer Science Engineering

SKILLS

- Programming Languages: C, C++, Python, HTML, CSS, JavaScript
- Libraries/Frameworks: NumPy, Pandas, TensorFlow
- Technologies/Platforms: GitHub, Roboflow, Kaggle, Power BI, Generative AI, Kore.ai
- Skills: Data Science, Data Analysis, Data Visualization, Artificial Intelligence, Machine Learning
- Databases: MySQL
- Soft Skills: Effective communication, Leadership, Time management, Problem-solving, Innovation, and Self-motivation

CERTIFICATIONS

- Python (Coursera)
- Data Science, AI & Development (Coursera)
- Microsoft DP-900: Microsoft Azure Data Fundamentals
- Microsoft AI-900: Microsoft Azure AI Fundamentals

SONAM

ASSOCIATE AT PWC

PROFILE

Ambitious Associate in Cloud and Digital group, specializing in Data Analytics, Artificial Intelligence (AI), and Machine Learning (ML). Experienced in data analytics for sales optimization using tools like Plx Alerts and Power BI. Skilled in data-driven decision making and digital strategies, effectively improving business outcomes through innovative solutions.

WORK EXPERIENCE

● Associate, PwC

Aug 2024 - Present

- Contributed to supply chain optimization projects by applying AI/ML techniques to improve efficiency, reduce costs, and enhance operational decision-making

● Intern, PwC

Feb 2024 - Aug 2024

- Leveraged AI/ML analytics for price promotion and elasticity modeling, enhancing sales performance
- Developed Power BI dashboards and automated workflows, streamlining decision-making processes

● Student Learner

Mahindra and Mahindra Limited, Sep 2023 - Dec 2023

- Developed and implemented OCR solutions using Google Colab for document management processes
- Utilized Python, Tesseract, and OpenCV to build and fine-tune OCR models, enhancing text extraction accuracy and speed across various document formats

PROJECTS

● AI-driven Optimization

- Created synthetic project execution dataset using a fine-tuned custom GPT model, simulating realistic project roles, timelines, and skill requirements to support robust model training and evaluation
- Applied ML techniques and business rules to allocate resources efficiently, incorporating factors like role to skill matching, availability, absence window and task dependencies

● Anomaly Detection

- Incorporated statistical measure such as z-score and IQR based thresholds to complement ML outputs, improving reliability and interpretability of anomaly detection
- Implemented anomaly detection using Isolation Forest and automated operational monitoring by developing PLx Alerts for real time monitoring

● Price and Promotion Analytics

- Maximized sales through data analytics and promotional elasticity
- Conducted Price Elasticity Modelling and Post Event Analysis
- Automated workbook task using python
- Created a Power BI dashboard for real time monitoring

RESEARCH PUBLICATIONS

● Intelligent and Adaptive Web Page Recommender System

- International Journal of Web Services Research (IJWSR), 18(4)(SCI Indexed)
Available at: [IJWSR Article](#)

● Machine Learning-based Smart Crop Recommender and Yield Predictor

- International Conference on Computing, Communication, and Intelligent Systems (ICCCIS-2022) (SCOPUS Indexed)
- Available at: [IEEE Xplore](#)
